

Société Anonyme de Participation et de Gestion (SPDG) is the holding company of the Périer-D'Ieteren family, one of the two major shareholders of the D'Ieteren Group.

The mission of SPDG is twofold. On the one hand, SPDG takes on the professional management of its strategic shareholding in D'Ieteren. On the other hand, via SPDG Ventures, it aims to partner with entrepreneurs in ventures that have a lasting impact on society. Companies included in the investment scope relate to mobility, smart city solutions and e-health in these specific contexts.

Consult our website at www.spdg.be for further information.

Investment Team Internship @ SPDG Ventures

Position

The selected candidate will provide support to the investment team in the sourcing, analysis and follow-up of the various investment projects pursued by SPDG Ventures

As a member of the investment team, she or he shall collaborate with the Investment Managers and report to the Senior Investment Manager

Principal responsibilities

Typical tasks entrusted to the selected candidate shall inter alia include the following:

- Market research and competitive intelligence across a number of markets and sectors
- Landscape studies of specific market segments and technologies
- Ad-hoc support in the preparation of internal reporting for the executive committee and board of directors
- Ad-hoc support in due diligence, related to the tasks described above and including as the case may be financial modelling and valuation
- Administrative support: maintenance of our database of leads and portfolio investments, tracking of portfolio company KPIs, organisation of the electronic and paper filing, etc.

Profile sought

The candidate will have a bachelor or master's degree in an economic, management or engineering discipline, preferably complemented by previous work experience in a relevant domain such as investment finance and/or strategy consulting

She or he shall have the intellectual breadth to understand the power of markets in different sectors, their limits, and the dynamic nature of industries

She or he shall also have demonstrated an interest in technology and be able to formulate a high-level understanding of the technological components of existing or prospective investments

Skills and qualifications

Strong numerical skills including familiarity with, and ability to work with, complex financial models

Experience with market studies and competitive intelligence

Capacity to work both independently and collaboratively within a small team environment as well as with external parties

Attention to detail and good writing skills

Ability to multi-task and to manage deadlines

Intellectual curiosity and analytical mindset

Fluent in English, and preferably French and/or Dutch

Our offer

This is an offer for a 6 to 12-month remunerated internship within a dynamic and evolving small-team environment, which could convert in an employment offer at the end of the assignment.
